2nd Prize Freshworks Hackathon 2022, Freshworks

Craftmanship Award, Freshworks

1st Prize PSQ Hacks 2019, PS QuickIT

Professional Summary

Versatile and results-driven Software Engineer with a strong track record of architecting scalable systems and leading complex integration initiatives. Currently working as a **Lead Platform Engineer at Freshworks**, where I design and deliver resilient microservices using **Java and Node.js**, and lead the development of an enterprise-grade **iPaaS platform built on Netflix Conductor**. My journey began at **PS QuickIT (now Credex Technologies)**, where I specialized in connector development and end-to-end project delivery, quickly establishing myself as a dependable technical lead. Known for cross-functional collaboration and a pragmatic approach to technology, I bring a deep commitment to building efficient platforms that enhance developer productivity and deliver outstanding user experiences.

Employment History

Lead Software Engineer - Systems, Freshworks, Remote

07/2021 - Present

As a member of the **Platform Engineering** team, I contribute to building highly scalable services that support a wide range of product offerings. My work spans **Knowledge Graphs, integration platforms, microservices, and communication services**, with a primary focus on **Java and Node.js**.

- **Knowledge Graph Development:** Working on building and evolving **knowledge graph solutions** to model relationships between entities and business concepts, enabling contextual understanding, intelligent data discovery, and improved connectivity across distributed systems.
- **iPaaS Solution Development:** Spearheading the development of an **Integration Platform as a Service (iPaaS)** from the ground up, leveraging **Netflix Conductor** for orchestration to enable intelligent service connectivity and automation.
- **Microservices Architecture:** Designing and implementing microservices that ensure high performance, fault tolerance, and scalability, forming the backbone of the platform.
- **Cross-Team Collaboration:** Working closely with multiple product and infrastructure teams to deliver cohesive and seamless solutions that address evolving user and business needs.
- **Omnichannel Communication Services:** Architected and delivered omnichannel services to support real-time, reliable communication across various channels, enhancing product engagement.
- **CI/CD Pipelines:** Built and maintained deployment pipelines for messaging services, streamlining releases and boosting operational efficiency.
- **MS Teams Bot Development:** Contributed to the development of the **Microsoft Teams messaging bot**, enriching the communication layer and improving user interaction.

I am committed to continuous learning, embracing emerging technologies, and delivering resilient, scalable platforms that drive product excellence.

Technologies: Knowledge Graphs, Java, Spring Boot, Spring WebFlux, Node.js, Netflix Conductor, Jenkins, Docker, Kubernetes, AWS, DynamoDB, Apache Tomcat, Git, JIRA, and more.

Technical Lead, PS QuickIT, Noida

01/2018 - 07/2021

I began my career at PS QuickIT as a Graduate Hire, where I gained valuable experience in the integration industry through my involvement in major delivery and data management projects. Over the years, I contributed to various project phases, taking on different roles to ensure successful outcomes.

Gem of the Quarter Q1 2019, PS
QuickIT

Rookie of the Quarter Q1 2018, PS
QuickIT

- **Project Contributions:** Actively participated in all phases of project delivery, including analysis, development, testing, and operations, adapting to various roles as needed.
- **Team Management:** Managed the CRM development team, overseeing project execution and ensuring alignment with client requirements.
- **Feature Delivery:** Successfully delivered new features within both Agile and traditional SDLC life cycles, enhancing product functionality and user experience.
- **CRM Expertise:** Established myself as a CRM expert, earning the trust of clients through consistent delivery of high-quality solutions.
- **Talent Acquisition:** Served as a member of the technical talent acquisition team, contributing to the recruitment of skilled professionals.
- **Training Leadership:** Led the Rookie Training Program for new recruits, facilitating their onboarding and skill development.

Technologies Used: Java, Jenkins, Node.js, Angular, Git, JIRA, Docker, C++, DynamoDB, Oracle WebLogic, and more.
